Product Description

Red & Infrared Therapy - Red light therapy is highly recommended by doctors as an all-natural therapy. It penetrates deep into the skin, or deep areas of tissue and muscle, is useful for improving skin, joint inflammation, and relieving body pain. Red light can be absorbed by the skin and increasing collagen production for optimal skin health. The near infrared light penetrates deep into the body tissues and is good for bones, joints, nerves and deep muscle problems, which is very effective in relieving chronic pain.

Will LED Light Therapy Work for Me?

If you're experiencing joint or muscle pain, it's likely that LED light therapy can be a viable solution. Products of ours can ease pain from numerous sources while also expediting the road to recovery. Consider LED light therapy for:

Chronic pain: Red and infrared LED lights relax muscles, increase circulation and reduce inflammation to treat chronic pain from conditions like arthritis, neuropathy, tendinitis, and more

Acute pain: LED light therapy may provide rapid relief for acute pain and help keep it from returning

Muscle recovery: Athletes and patients recovering from injuries can implement LED light therapy to expedite tissue repair by increasing blood flow and stimulating cellular function

Red Light Cap - LED Light Therapy for Hair Regrowth

Red Light Cap LED Light Therapy use the LED technology to help regrow thicker hair and prevent hair loss and provide oil control. (Convenient & Comfortable to Use): Our Red Light Therapy Cap makes it easy, convenient and economical to receive effective red light therapy in the comfort of your own home.

Product Features:

- * Safe and effective**
- * Comfortable to wear**
- * USB-powered design enables portability and convenience**
